a) An applicant that uses electric generation, transmission or distribution facilities that it owns, controls, or operates in serving customers shall be deemed to possess sufficient technical capabilities to serve retail customers identified in this Subpart if it maintains at least two technical staff on duty or on call 24 hours each day to operate and maintain applicant's facilities as needed. The technical staff must have at least two years of technical operational experience in an electric generation, transmission or distribution facility substantially similar to the facility that the applicant owns, controls or operates in serving customers, and meets the criteria in subsections (b) and (c) of this Section.

b) An applicant shall be deemed to possess sufficient technical capabilities to serve retail customers identified in this Subpart if it has at least one individual on its staff with at least four years experience buying and selling power and energy in wholesale markets and one year of scheduling experience working for an entity that is either a member of PJM, a market participant in the Midwest ISO, or has a system operator certificate from NERC, or has earned Certified Energy Procurement Professional status by the Association of Energy Engineers or equivalent certification.

The exhibit shall provide a description of the relevant occupational experience for each person, including a description of the duties and the duration of the duties being used to meet each experience requirement of this Section.

e) In the event the applicant does not meet length of experience qualifications set forth in this Section, the applicant shall demonstrate the extent its technical resources and abilities match the services that it intends to provide to its customers. The Commission may impose such terms and conditions as deemed necessary in order to insure the applicant is technically qualified, commensurate with the anticipated scope of the service to be provided and customers to be served.
